Quality

Oilfield Steel Supply LLC is committed to meeting customer, statutory and regulatory requirements, and increasing customer satisfaction through the continual improvement of our products, services, people and the effectiveness of our quality management system. This policy provides a framework for establishing quality objectives that are reviewed and measured for key indicators such as on-time delivery, performance, safety and environmental. Our Quality Management System is ISO 9001:2015 certified and we are currently in the process of applying for API Q1.

The only thing stronger than steel is the team that provides it.

Providing the perfect combination of material chemistry, mechanical properties and shape that can be machined into a high precision, high performance component takes more than just experience. It takes vision, knowledge and above all, a deep understanding and appreciation of the deadlines that are required. We pride ourselves on our ability to be able to deliver the right material, at the right price, and at the right time. Whether its heat treating, testing, cutting to length, or machining a semi-finished component to your provided dimensions, we can get you what you need, when you need it. Through the combination of our in-house capabilities and a network of highly quality trusted service providers, we can do anything to our steel for you.
